

## **BRAMBLE HOLLOW FARM**

### **2023 FARM BRED HATCHING EGGS**

**New Hampshire:** We've been working on this line since 2017 and have seen great improvement in the composition of the table-ready carcass, notably in the size and meatiness of the breasts. Our New Hampshires are very hardy, larger than most New Hampshire lines and good for meat as well as egg layers. They are the powerhouse of our farm's table egg layers and produce a brown egg. Eggs offered will come from 2 separate breeding families and will be marked accordingly.

**Black Copper Maran:** These large feather-footed beauties lay dark brown eggs.

**Olive Egger/ Easter Egger:** A smaller framed layer that lays green/ blue eggs. These ladies are F1 crosses and F2 crosses. Male from a blue or olive egg x female from a blue or olive egg. Many females from this pairing will lay olive or blue eggs. Some will lay brown eggs.

**Olive Egger /Easter Egger Maran Back Crosses:** F1 females from the above line Back Crossed with a Black Copper Maran Male. Many females from this pairing will lay deep olive eggs, all eggs should be olive or copper.

#### **SHIPPED egg pricing**

\$30 per dozen plus shipping  
(2022 USPS pricing was \$17.00 per dozen)

#### **On-farm pick up pricing**

\$24 per dozen
